

Printing Double Sided on the Dell 5310 Printer With Mac OS X

1. Go to system preferences on your Mac. Click the apple icon on the upper left hand of your screen, and click system preferences.
2. Select Print & Fax. Select the printer you'd like to use. In our example, we selected the Southern Upper Info Commons printer. Highlight, and select Options & Supplies.
3. A new window opens up. Go to the "Driver" tab, and ensure "Duplex Printing Unit" is selected, as shown in the picture below:

- 4.
5. Click OK. Open the document/page you would like to print, and press print. Click the expanding arrow, as shown below:

6. Ensure "Two-Sided Printing" is checked, and hit print.
